### Kentucky Leads with Dry Vote

Kentucky and whisky are no longer linked together. For years the magnificent corn crop of the Blue Grass region could be turned into cash in no other way so profitably as by way of the still. As a result, immense distilleries sprang up in different sections. Millions were invested in them, and out of them came greater millions of expense for caring for the resultant suffering, sorrow and crime. Also there came a great procession of men, wrecked, useless, a burden on society, a source of disappointment to friends, and of grief to families.

Today this is changed. People are learning that the man is of more worth than the dollar-of more worth than many dollars. That whisky destroys the man. That it renders him unfit for business, unsafe in the use of machinery, that it lessens his efficiency in the store, in the post-office, on the farm, that it renders him okno value on the railroad, in the army, in the navy.

Already most of the counties in Kentucky are dry. The people will soon be ready for state-wide prohibition. The new legislature, which came in session January 1, honors itself and the commonwealth by making Kentacky the first state to vote in favor of the proposed pro-

hibition admendment to the national constitution.

### The Way to Peace

"Any body of free men that compounds with the present German Government is compounding for its own destruction. . . . Any man in America or anywhere else that supposes that the free industry and enterprise of the world can continue if the Pan German plan is acheived and German power fastened upon the world is as fatuous as the dreamers in Russia. What I am apposed to is not the feeling of the pacifists but their stupidity. . . .

'If we are true friends of freedom of our own or anybody else's we will see that the power of this country and and the productivity of this country are raised to their absolute maximum, and that absolutely nobody isallowed to stand in the way of it.

Our duty is to stand together night and day until the work is finished."—From President Wilson's Address to the American Federation of Labor.

Go back to the simple life, be contented with simple food, simple pleasures, simple clothes. Work hard, pray hard, play hard. Work, eat, recreate and sleep. Do it all courageously.

We have a victory to win.

BIBLE STUDY CLASS

## Berea College Safer Than Living at Home!

Every Student Given Personal Attention in a First Class Hospital Under the Care of Two Physicians and a Corps of Graduate and Skilled Nurses Giving Full Time to the Care of Students

"A Nurse might have saved her"

Berea College Hospital

### The New Building

Now Completed

000

Is three stories high

Has electric elevator

Has spacious sun parlor

Is fireproof throughout

Is equipped for hydrotherapy Will accommodate fifty patients

Has most perfect operating room and surgical equipment

College Physician in Office Examining Patient

### What it Costs at the Hospital

THREE THINGS COST WHEN ONE IS SICK

- 1. The Doctor's call. At home you often need a doctor when you can't get him. At the hospital he charges for only one call a day but is ready to see the patient whenever needed at a moment's
- Medicines and dressings are furnished at cost.
- Board and nursing are included in the price of the room.

HOSPITAL RATES

Patient in ward, \$1.00 per day; (\$6.00 a week). Patient in private room, \$1.50 per day (and up). Obstetrical patients, \$5.00 per week.

### What the Hospital Does

Is a home-like, friendly place.

Cares for mothers at child birth.

Provides full surgical equipment.

Is cheaper than staying at home.

Gives eighteen months Nursing Course.

Specializes in Diseases of the Eye, Nose, Ear and Throat.

Sends doctor or nurse to attend cases of every description.

Furnishes place where any physician can bring his patients.

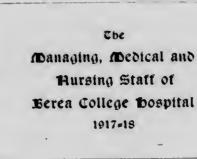

it. II. Cowley, M. D., College Physician

### Advantages of Hospital Care

- 1. The Hospital has some one on duty every hour of the day and night. Its patients are never without care.
- 2. Those in charge are specially trained in the care of the sick.
- 3. The number of doctors and nurses makes frequent consultation possible.
- 4. The hospital with its many patients is sure to have all the best equipment, instruments, etc.
- 5. The hospital is conducted for the benefit of the school and community and not to make money.

### THE SYMPATHETIC TOUCH

Berea College has a thoroughly organized Health Department with every modern facility for acting quickly in any emergency. Monitors report students who are not well every day to the College Doctors; besides, students are urged to freely call at the Doctors' Offices for advice. This medicid attendance costs the student nothing. Our Doctors have always been successful in warding off any epidemic. There is less danger at Berea than staying at home. Every means is provided for looking after sick students. Our nurses and attendants are employed because they have the synpathetic touch that mothers have for their children.

ARE FACING A REDUCTION OF WHEAT RATIONS.

Applications Near the Three Billion Mark-All Adult German Allen Enemies in United States Must Regis-

(From Committee on Public Information.) Wushington.-According to the food administration, shortage of wheat in France is becoming more and more alarming each week. The minister of general revictualing indicated recently that a further reduction of 20 per cent In the bread ration would soon become Imperative.

Denmark is now looking forward to a reduction of wheat rations. Final figures for the coroni impress show a total of about 62(00),000 bushels, which is 20,000,000 bushels less than in 1919 and about 10,000,000 less than was extimated in the summer, when the populace was put on bread rations. The anthorities are already considering a further reduction in the allowed consumbtlon.

The food situation in Switzerland is rapidly falling to the danger line. A ration that is far below the consumption in many of the countries at war has already been ordered. Under the new regulations the Swiss may have only a pound and a half of sugar per person per month. The brend ration has been fixed at about half a pound a day, and the butter ration at onefifth of a pound a month.

Applications for war-risk insurance by men of the army and navy have nearly reached the \$3,000,000,000 mark, and continue to come in at a rate of about \$60,000,000 a day. The average amount applied for per mnn in \$8,630, the average having increased stendily since the act went into effect, October 6.

For persons who Joined the colors before October 15, 1917, the last day for applying for government hisurance is February 12, 1918. Intensive efforts are being made by communding officers to love all their men take insurnice before that date.

The maximum amount which may be taken by any man is \$10,000.

Among the regulations for the registration of German allen enemies in the United States during the first week of February, are the following:

All German males of the age of fourteen years and upward are required to register. Notice of time and place of registration will be given by pub-Healton in newspapers.

The utlidaylt of each registrant ionst be accompanied by four unmounted photographs, signed across the face so as not to obscure the features, and the finger prints of each registrant shall be taken.

Hetween 10 and 15 days after reg istration each allen enemy must ugoln uppear before his registration officer obtain a registration cord, which print. Tlds card must be carried by the registrant for future identification. An other enemy who clonges his

place of residence to another place within the same registration district must at once report the clauge to the registration officer. No allen enemy shall move out of the district without a permit. Application for a permit most be made upon a form furnished by the department of Justice, giving full puriferiors as to date, reason for change, and intended place of resi-

To increase France's crops and to lighten the burden of toll on ber old men, women and children 1,500 farm tractors will go to that country from the United States. The first hundred are already on the way, and the whole number will be in France by March in time for the spring plawing. Deck space was provided for the first shipment on a naval transport. Schools of instruction will be organized.

The acreage nown to crops in the uninvaded portion of France in 1917 was about 10,000,000 acres less than In 1913, or 24.4 per cent. The Increased production through the une of tractors this year is expected to greatly improve the food altuntion.

According to records of the nelective aervice, country boys do not show much physical auperiority over those of the cities. For purpose of comparia nelection wan made of cities of 40,000 to 500,000 population, and a corresponding net of counties of the same total size. in the physical examinations 28.47 per cent of the city boys were rejected, an against 27.96 per cent of the country hoys.

Theaters and restaurants in Denmark clone at 10 p. m. to save lights. To save kerosene, which is nold at a price regulated by the government at 72 cents a gallon, Greenland whale oil is being tried for lighting. It is entimated 200,000 acetylene lamps are now

in process of manufacture. The distillation of all kinds of alcohol except for industrial uses is prohibited. A large part of the available nicohol will be needed for use in the new Incamilescent lamps. It is estimated that 2,000 tons of grain will be saved by the new regulations.

The cemulitete on public informs tion has made the following translation of a story appearing in the October 15, 1917, Issue of the Leipziger Votkszeltung:

"A sample of the fashion after which bloated landlords trent the wives of soldlers his been brought to our attention from Upper Langenau in Sliesh. (the of the bired men of Doctor Muelter's agricultural estate has been for a long time at the front. Ills wife, who had worked alongside her husband before the war after the usual custom, remulued in the ranka of the field hands and accordingly retained her farm cottage. Cletober 1 this womun got the following letter:

"The undersigned ballff of the eathre hereby gives you notice as of this date to the field service for January 1, 1918. On that day you are to give up your house. The work which you are doing on the farm does not comperesate the farm for the loss which neernes to it through the continued support of your family. Look out for yourself away from this farm, your house is needed for other use,"

"The woman communicated the notice to her husband with these words: "I must tell you my distress, soon I shall not be able to see the paper for my tenrs. What shall I do? Winter is at the door and the cottage is full of little children.'

"Thus the bailiff of the estate of a blooted inndiord turns a faintly with eight children om of doors in midwinter while the man is at the front. Comment takes core of itself."

War credits extended to foreign govrnments since the l'utted States en tered the war total \$1,236,400,000, tif this Gren firitain received \$2,045,000, 1001; France, \$1,285,000,000; Italy, \$500,000,000; Itiisşür, \$125,000,000; Betglum, \$77,400,000; Serbin, \$4,000,000. It is estimated that 50,000 different articles are needed in modern warfare.

The clothing equipment of but one infaatrymin for service in France in indes the following: Hedsack, three wool ldnakers, waist belt, two pairs wool breeches, two wool service coats, but cord, three pairs snumer drawers, three pairs winter drawers, pair wool gloves, service hat, extra shoe laces, two pairs canvas legglus, two flomel shirts, two pairs of shoes, five pairs wool stockings.

tent pole, poncha, shelter tent. Listed as "cuting mensils" the infuntryman receives food to be carried in lds haversack during field service ennieen and cauteen cover, cup, knife fork, spoon, mest can, haversack, pack enrrier, first aid kit and pouch.

### PRESIDENT WILSON ADVOCATES MAINTENANCE OF CHILD LABOR STANDARDS

The following letter defining Presdent Wilson's stand on the maintenance of labor standards during the war has just been received by the National Child Labor Committee:

"As the labor situation created by the war develops, I am more interested than ever, if that were possible, in throwing all the safe guards possible around the labor of women and children in order that no intolfewer arrests for drunkenness than evable or injurious burden may be placed upon them. I am, therefore, very glad ludged that the National Child Labor Committee is diligently assault were 153 and in the two wet continuing its labors and extending its vigilance in this important mat-Arrests for renelty to animals were ter. By doing so it is contributing 101 in the two wet months, 58 in the to efficiency, and economy of production, as well as to the preserva-

Woodrnw Wilson, Although President Wilson has indicated in a number of speeches that Labor Committee is his first direct ulterance on the subject.

"The National Child Labor Committer plans to use Child Lahor Day, January 27 (January 26 for synatures will be convening about that time and the Committee hopes thru the medium of schools, charches, Y. M. and Y. W. C. A's, women's ctabs and other organizations to so awaken the public to the need of continuestaurant at Saloniki and asked for ing the protection of children in war time that any legislation tending to break down standards may be forestalled."

"I'm sorry, gentlemen, but I can't Special pamphlets outlining European experience and the steps already taken in America have been prepared by the National-Child Labor Committee for use on Child Labor Day. Copies of these pamphlets may be obtained from the Committie's headquarters at 105 East 22nd Street, New York City.

Do not stand directly under a chandeller, near a radiator nor on a register. Do not use the telephone.

### TIRE TROUBLE.

Why Careful Driving Means Less Expenie and Fevrer Blowouts. The automobile owner should renlize

that a vast proportion of the breakdowns may be avoided by careful driving. Frequently a stone lettle in the tire could have been avoided if the driver had taken the trouble to swing his wheel a little to avoid contact with the obstruction. Cuts from glass or metal objects may be targely avoided If the driver pays strict attention to what he is doing. The man who takes a rallway track hend on and at speed rons the risk of shooting his front wheels up in the air and bringing the tires down with a tind on the far mils, thus cansing a bruise that may result ln á blowout later on,

The drst thing necessary to be impressed on the average driver is that be bluseff is the final court in deciding just what mileage he is to get from his casings. If he will only drive care fully most of his troutder will be cured before they occur. Whenever a casing comes in violent contact with a sharp object of any sort, whether it is a stone or a rollway track, a small break will protably be unde in one of the layers of fabric. The friction engendered in

service widens this small opening as strand after strand gives way under the strain. Fluilly the inner tobe forces its way into the break, and sooner or later the opening closes down on the take, pluching it and causing a blowest of the liner relativer. The alr, at a pressure of between eighty or ninety pounds, lairsts its way through the injured place, tearing the small rupture wide open in a gaping blowont. And all because the driver falled to talst the wheel a little to avoid a chance thing stone in the road or refused to pull up a little to take a raffway crossing diagonally and easily.

To Teil an Officer of Our Army From a Private

A MILITARY man can tell at a glance a soldier's rank, and it will surely interest the laymau to know just how he can read the soldier's rank and arm of service by a glance at the leggings or cap or coat sleeve

Take, for Instance, the cord on the bat. If it's a pluin blue cord it belongs to no infantry soldier; if it's red the wearer belongs to the artillery and if yellow to the cavalry. The hat cord worm by an officer is of black and gold with two little gold acorns.

When caps are worn the soldler's cap is the same shape as the officer'a. but it is minus the braid and bears in front the crossed arms of his service and the regimental number. The officer's cap has a band of braid and a coat of arms indicative of the state Regular officers have the United States coat of arms,

The collars of the coat also tell their tale to the experienced eye. The sol dier's collar has a disk of bronze with the name of his state; if a regular it has "I'. S." On the other side of the collar mother disk gives his regiment, communy and arm of service. The officer's collar has no disks. It lells his state, arm of service and regiment. If a regular officer the state is omitted and the symbol "U, S." is used. The arm of service is indicated by crossed rifles for infantry, crossed subers for envalry and crossed cannons for artitery. First Hentenant fma a silver bar and if a captain two bars.

If a coat siceve has two rows of stitching and nothing else the wearer is a private. That of the oilicer is dislinguished by a row of brown braid.

The overcont of a private or noncommissioned man simply has a cuff or else a strap of cloth, which luttims the sloeve tight around the wrist. But the sleeve of the officer's overcoat is cuttless. If it is perfectly plain with out braid the wenter is a second Heu temant. A soutache of one row Indi eates a first lientennni; two rows, a captain; three rows, a major; four rows, a lientenant colonel, five rows, a colonel. If general officers the

stripes are broad, black and horizontal, Even the buttons at the back of an overcont will tell you at a glance whether the weierer is an officer or otherwise; if the two buttons are hone It is the rost of an officer. If they are bronze and have the cont of arms of the United States it proclaims the

wearer to be an enlisted man. The leggings of a soldier and those of an officer are also different. Those of the former are olive drab canvas with lacings, while those of the latter

are of leather.

### SUNDAY SCHOOL

Lesson 4.—First Quarter, January 27, 1918.

THE INTERNATIONAL SERIES

Text of the Lesson, Mark 2:1-12— Memory Varse, Mark 2:5—Goldan Text, Mark 2:10—Commentary Prapared by Rev. D. M. Stearna.

This leason on the forgiveness of sins is found in Matt. 9 and Luke 5, as well as in Mark. The necessity of the forgiveness of our ains is seen in Christ's commission that repentance and remission of sins should be preached in his name among all natious; in Peter's exhoriation at Pentecosi that they should repent and be haptized in the name of Jesus Christ for the remission of sins, and in l'aul's declaration at Antioch that through this Man is presched unto you the forgiveness of ains, and by him all that believe are justified from all things (Luke 24:47; Acia 2:38; 13:38, 30). On the occasion of the incident of our lesson he was teaching in a house in Capernaum, and there were l'harisees and doctors of the law sitting by which were come out of every town of Galliee, and Judes, and Jerusalem; and the power of the Lord was present to heal them (Luke 5:17). The meeting was diaturbed by men uncovering the roof to let down through it a man sick of the isy, lying on a hed, whom four of friends had brought to Jesus, heing that he would heal him, When

they could not reach Jesus with their sick friend because of the multitude about the house, their falth and perse verance took this method of accomplishing their object. The Pharisees and the doctors were probably disturbed by this unusual proceeding, but the Prince of Pence was surely calm as usual. He had been preaching the Word to all who could hear him, opening to them the Scriptures, as was his ensiom (Luke 24:27, 44), but now he turns to the alck mun with the wonderful words, "Son, be of good cheer, thy slus be forgiven thee." He was brought that his body might be healed, and many are thinking more of that even now, than of the forgiveness of their sins, but the healing of the soul is the first and all-important thing. "Ye must be born again" is the essential word for even a Nicodemus, and the new birth includes the forgiveness of sina. When we as sinners plend gnlity, and truly receive the Lord Jesus, putting all our trust in his grent sicrifice of himself for our slos, believing that his own self bore our slas he his own body on the cross, wounded for our transgressions, bruised for our Iniquities, then we can rejoice that we have been made children of God, accepted in the Iteloveil, and in him have redeputlou, the forgiveness of our sins, with the assurance that they shall never be mentioned to us (Rom. 2:13, 24; 1sa, 52:56; 1 Peter 2:24; John 1:12; I John 2:12; Eph. 1:6, 7; Isn. 43:25). It is written that Jesus saw their faith (vs. 5), which may have lueinded the fidth of the sick man, but we know from the story of the Roman centurion, the Syro-Phoenician woman and the Capernaum pobleman thut our faith can bring blessing to others (Mict. 8:13; 15:28; John 4:50). Nothtng seems to please our Lord like great falth, a simple childlike confidence hr him, just taking him at his word and counting on him to do as he has sull; and without faith it is impossible to please him (Heb. 11:6), yet how often he had to say to his disciples, "O ye of little falth" (Matt. 8:26; 6:30; 14:31; 16:8). The Scribes said truly when they said, "Who can forgive slus but God only?" (vs. 7). And if they had added: This man must be God, they would bave remoned correctly, but seeing blue only as a man they accused him of blusplemy. No mortid man can forgive sins, whether he be priest, or bishop, or archbishop, or pope, but the humblest believer is authorized to lead a sluner to Christ and show blm In the Word the way of forgiveness, and the Spirit by his Word will give assurance of forgiveness to every true

Jesus perceives all our reasonlags vs. 8) and knaws every thought of our hearta and by his Spirit and his Word will cast down all reasonlags and bring all our thoughts into subjection to himself (Ezek,11:5; I's, 139:1-4; II Cor. 10:4, 5, murgin).

Having given the man forgiveness of his sins, and health of soul, he also gave him health for his body, and he went forth before them all carrying that which had earried him, and his four friends, as well as himself, must have been filled with joy. Such faith as theirs is never disuppointed. The same great sacrifice of Christ, by which we obtulu forglyeueaa of our aius, inaures to us at the resurrection of the just a perfect body just itke his glorifled body (Phil. 8:20, 21; I John 8:1, Hetween our salvation and that hright morulug of his coming ugain he will see to it that these mortel boiles shall have all the health that will glorify him provided that we are fully yielded to him, a living sucrifice, ever only all for him, determined that he shall be muguified in these bodies whether by life or death (Itom. 12:1, 2; Phil. 1:20). Those who witnessed this tuiracle glorified God, saying, "We never saw it on this fashion" (va. 12), or, "Wo have seen strange things today" (Luke 5:26). There are so many palsied or paralyzed people lu ali the churches, whose feet und hunds, and tangues refuse to glorify God by word

# Temperance Notes as

Christian Temperance Union.)

THE ENEMY ON LAND.

Mr. J. S. Strachey, editor of the Specialor (London), once an advocate of the drink traffic, has since the iseginning of the war made probibition the policy of his paper. In a recent public address he told this story:

"A rity, though its armies were victorious, was in dire straits for food. Strict search was made to see that unthing that could be used for food should be wasted, and lo, a great slore of barley and sugar was found. And the general thunked tool that they were saved. There was enough barley and augar to enable them to hold out till the re-victualling that was sure to come in a few months. The barley, mixed with corn, would make excellent bread and the sugar would save the children.

"Alaa, and the civil authorities, 'all this barley and sugar must be turned into beer; we dare not touch

"The general, who was a simple soldier and did not understand politics, was angry. This is a town of sane people, not a lunatic asylum, nobody can be allowed to turn into beer what might be made into bread and so save the people."

"litt I was even so. The city fell and the conquerors drank the beer!" Mr. Strachey hammered his point

itome with these words:

"The proper thing to do, the straight thing to do, the only honorable thing to do, is to stop the brewers and give the people bread. With famine facing the world, the government must stay the food destroyers on land as well as on sea, if we are to lave victory."

CANADA'S WHITE MAP.

Provincial prolabition is now in opention in the provinces of Alberta, Munitoba, Nova Scotia, Ontario, Prince Edward Islands, Saskatche-wan, New Hrunswick and British Columble. At the time the above map was made the province of Quebec was 84 per cent dry. Since then Missisquol county and the city of Quebec have voted dry. A proposal by Yukon territory to petition the Dominion parliament for territorial prohibition was defeated by the narrow margin of three votes. In the remaining part of the Dominion of Canada, generally known as the Northwest territories, special permits, specifying the kind and quantity of liquor which they

TESTIMONY OF ARMY DOCTOR.

The use of alcohol results in much inefficiency. It is well understood by all who control large bodies of men that alcohol and effective work are incompatible. Abundant liquor means n full guardiouse and many courtmartial cases. In the matter of larget shooting, careful experiments conducted in Sweden showed an average of 40 per cent fewer hits by marksmen after one drink of brandy. Since alcohol markedly laterferes with the mental processes, it is piala that decisions in militury crises are apt to he faulty. Alcoholism and venereal lisensea are closely allled.-Frank R. Keefer, M. D., Lieutenant Colonel, Medical Corps, United States Army.

INTERFERENCE WITH PERSONAL LIBERTY.

The Chicago, city council committee on health has refused to consider an application for a permit to open a shop dealing exclusively in horse meat, is not this interfering with personal liberty, a man's right to eat or drink what he wants, and then remember, loo, that horse ment will probably be sold anyway in some shops whether the permit is granted or not.—The Illinois issue.

MISSOURI MASONS.

The Grand Lodge of Free and Accepted Masons of the state of Missouri, at a meeting held in St. Louis September 19, pussed amid cheers, a most drastic resolution in favor of bone-dry prohibition. The resolution provides for the expulsion from the order of any Mason signing a pelition for a saloon or a saloonist's bond. The resolution passed by a vote of 1,180 to 360. Counted by lodges, the vote stood 236 to 72.

NO DIFFERENCE.

Distinguishing hetween alcohol in whisky and alcohol in beer is like distinguishing between sunlipox in big splotches and sualipox in little splotches. Same old poison in either form.—American Issue.

KNOCK-OUT DROPS.

Alcohol is not a stimulant to the real man, but a form of "knock-out drops," putting the real civilized man out of business and retensing the primitive, latent savage.—Life Extension its limitation.

CHAPTER XXII.

WILLIAM'S Inward state became chaotle.

Prove his composure, but he found that he had lost almost all control over his features. He had no knowledge of his actual expression except that it hurt him. In desperation he fell back upon

They Wars Watking With Thair "Stummicks Out of Joint."

hauteur. He managed to frown and walked proudly. At that they langhed the more, Waliace Banka rulely pointing sgain and again at William, and not till the oncoioling sufferer reached a spot within twenty feet of these delighted people did he grasp the significance of Wulline's repeated geature of coloring. Even then be understood only when the gesture was supplemented by half articulate shouts:

"Rehlnd you! Look behind you!"
The stong youth turned

There, illrectly behind him, he beheld an exclusive fittle procession consisting of two damsels in single file, the first soiled with house moving, the second with apple sance.

was defeated by the narrow margin of three votes. In the remaining part of the Dominion of Canada, generally known as the Northwest territories, the sale of liquor is prohibited, and strong drink may only be imported on special permits, specifying the kind

They were walking with their "stnuruleks out o' joint."

At sight of William's face they squeated They turned and ran They got themselves out of sight Simultaneously the air filled with

soild thunder and the pompons train shook the ground. Ah, woe's the word: This was the thing that meant to bear away the golden girl and honeysuckle of the world-meant to and would, not

of the world—meant to and would, a lating one from second!

Now a porter had her handlag.

Doug handen to be a porter—year.

Dear heaven, to be a porter-yes, a colored one! What of that now? Just to be a simple porter and journey with her to the far, strange pearl among eitles whence she had come!

The gentle porter bowed her toward the steps of his car, but first she gave Flopit into the hands of May Parcher for a moment and whispered a word to Wallace, itanks, then to Joe Itullitt, then to Johnnie Watson; then she ran to William.

She took his hand.
"Don't forget," she whispered—"don't

forget Lola."

He atood stock atili. His face was

blank.

She infolded May Parcher, kissed her devotedly; then, with Flopit once more under her arm, abe ran and

"Why, Willie Baxter!" she cried, blinking at him.

jumped upon the steps just as the train began to move. She stood there on the lowest step, slowly gliding away from them, and in her eyes there with a spurkle of teles lett, it may be from her laughter at pror William's pageant with June and Runnin Kristed or, it may be, not

r, it may be, 1011 She could may wave to her tree 'er answer to their gentures of farewell, for her arms were too full of Flopit and roses and candy and aweet peas, but she kept nodding to them in a way that showed them how much sha thasked them for being sorry she was going and made it clear that she was acry too and loved them att.

"Goodby!" she meant.

Faster she gilded. The engine passed from sight round n curve beyond a culvert, but for a moment longer they could see the little figure upon the ateps, and to the very last gilmpse they had of her the small, golden head was still nodding "Goodby!" Then those steps whereon she slood passed in their turn beneath the culvert, and

they saw her no more, Loia l'rail was gone!

Wet eyed, her young hoatess of the long aummer turned away and atumhled against William. "Why, Willie Baxter!" she cried, blinking at him.

The last car of the train had rounded the curve and disappeared, but William was still waving farewell, not with his handkereblef, but with a symmetrical one pound parcel, wrapped in white tissue paper, girdled with blue ribbon.

"Never mind," said May Parcher.
"Let's all walk uptown together and
talk about her on the way, and we'll
go by the express office, and you can
send your caudy to her by express,
Willia"

Willie."

In the smallish house which all summer long, from morning until late at night, had resounded with the voices of young people, echoing their songs, murmurous with their libeories of love or vibrating with their giee, sometimes shaking all over during libeir more boisterous moods—in that house, now comparatively so vacant, the proptietor stood and breathed deep breaths.

"Hah!" he breathed sonoronsly. He gave himself several resonable slapa open the cleat, then went out to the porch and sat in a rocking chair near his wife. He spread himself out expansively. "My glory," he said. "I believe I'll take off my coat! I haven't had my coat off outside of my own room all summer. I believe I'll take a vacation! By George, I believe I'll stay home this afternood!"

"That's nice," sabl Mra. carcher.
"Itah!" he said. "My glory, I believe
"I'll take off my shoes!"

And, meeting as objection, he proceeded to carry out tids plan.

"Itali-ali?" he said and placed his stocklinged feet upon the ralling, where a number of vines, running upon strings, made a arreen between the porch and the street. He lit a large clgar "Well, well," he said, "that tustes good! If this keeps on I'll be in as good shape as I was last spring before you know it?" Leaning fur back in the rocking chair, his hands belilind his head, he smoked with fervor, but suddenly be innoed in a way which showed that his nerves were far from normal. His feet cause to the floor with a thump, he jerked the cigar out of his mouth and turned a face of coasternation apon his wife.

"What's the matter?"
"Suppose," said Mr Purcher huskily

"suppose she unisod her train"

Mrs. Purcher shook her head.

"Think not?" he said brightening "l

ordered the livery stable to have a carriage bere in lots of time."
"They did." said Mrs. Parcher severely; "about \$5 worth."

"Well, I don't ailed that," he returned, putting his feet up again. "After all, she was a mighty fine little girl in her way. The only trouble with me was that crowd of boys. Having to listen to them liked to kill me, and I believe if she'd stayed just one more day I'd been a goner?"

"Mr. Parcherf" a youthful voice re-

He rose and, separating two of the vines which screened the end of the porch from the street, looked out. Two small maidens had pairsed upon the shlewalk and were peering over the picket fence.

"Mr. Parcher," sald Jane as soon as file head appeared between the vines— "Mr. Parcher, Miss Pratt's gone. She's gone away on the cars."
"You think so?" he asked gravely

"You think so?" he asked gravely.
"We saw her," said Jane. "Rannie an' I were there. Willie was goin' to chase us, I guess, but we went in the baggage room behind trunks, an' we have her go. She got on the ears, an' It went with her in it. Honest, she's gone away, Mr. Parcher."

Itefore speaking Mr. Parcher took a long look at this telepathic child. In his fend eyes she was a marvel and a dayling

"Well, thank you, Jane," he said.
Jane, however, bad turned her head
and was attring at the corner, which
was out of his sight.

"Oo-oo-onh!" she murmured.
"What's the trouble, Jane?"
"Willie!" she said. "It's Willie

"Willie!" she said. "It's Willie an'
that Joe Rullitt an' Johnnie Watson
an' Mr. Walluce Banks. They're with
Miss May Parcher. They're comin'
right here!"
Mr. Parcher gave forth a low moan

and turned pathetically to his wife, but she cheered him with a laugh. "They've only walked up from the station with May," she said. "They won't come in. You'll see!" Helieved, Mr. l'archer turned again

to spenk to Jane, but she was not there. He caught but a glimpse of her, running up the street as fast as she could, hand in hand with her companion.
"Hun, liannie, run!" panted Jane. "I got to get home an' tell mamma about

got to get bome an' teli mamma about it before Willie! I bet I ketch Hall Columbia, anyway, when he does get there!"

And la this she was not mistaken;

And in this she was not mistaken; she caught Hall Columbia. It lasted all afternoon."

It was still continuing after dinner.

It was still continuing after dinner that evening, when an oft repeated yodel, followed by a abrill walled "Jane-ee! Oh, Jane-nee-ee!" brought her to an open window downstairs. In the early dask she looked out upon

the washed face of Itannie Kirsled, who stood on the lawn below, "Come on out, Janie. Mamma says I can stay outdoors an' play illi half past 8."

Jan'e shook her head. "I can'l. I can't go outside the house till iomorrow. It's because we walked after Wille with our stammicks out o' joint."

"t'an't you come out at all?" linnale arged. "Go ask your mother. Tell her"--

"How can 1?" Jane laquired, with a little heat, "when she isn't here to ask? She's gone out to play cards, she and paps."

Itannie swung her foot, "Well," she sald, "I guesa i haf to find somep'n to do, 'll'night!"

With head bowed in thought she moved away. Jane, on her part, left the window and went to the open front door. Conscientiously, she did not cross the threshold, but restrained herself to looking out. On the steps of the porch sat William alone, his back

toward the house.
"Willie," said Jane softly, sad, as he made no response, she lifted her voice a little, "Will-ee;"

"Whatchwant?" he grunted, not moving.
"Willie, I told mamma I was sorry I

made you feel so bad."
"All right!" he returned curtly.
"Well, when I haf to go to hed, Wil-

"Well, when I haf to go to hed, Willie," she said, "mamma told me because I made you feel bad I haf to go upstairs by myself tonight."

She paused, seeming to hope that he would say something, but he spake not, "Willie, I don't haf to go for awhile yet, but when I do-maybe in about a half an hour-I wish you'd come stand at the foot of the stairs till I get up there. The light's lit upstairs, but down around here it's kind of dark."

"Will you, Wille?"

He did not answer.

"Oh, all right?" he said.

This contented her, and she seated herself so quietly upon the floor just inside the door that he ceased to be aware of her, thinking she had gone away. He sat staring vacantly into the darkness, which had come on with that abruptness which begins to be noticeable in September. His elbows were ou his knees, and his body was sunk far forward in an attitude of descolation.

The small noises of the town—that town so empty toulght—fell upon bis ears mockingly. It seemed to him incredible that so hollow a town could go about its nightly affairs just as usual. A man and a woman going by laughed loudly at something the man had suid. The sound of their tanghter was horrid to William. And from a great distance—from far out in the country—there came the faint, long drawar whistic of an engine.

That was the sorrowfulest sound of all to William. His lonely mind's eye sought the vasty spaces of the cust-crossed prairle and river and hill to where a long train whizzed onward through the dark, further and farther away. William uttered a sigh so hourse, so deep from the tombs, so prolonged, that Jane, who had been relaxing herself at full length open the floor, sat up straight with a jerk. But she was wise enough not to speak.

But she was wise chough not to speak.

Now the full moon cause imsequered ing among the branches of the shade trees. It came in the likeness of an enormous feotball, glorlously orange Gorgeously it rese tigher, cleared the bees and resumed its wonted hopertonation of a silver disk. Here was toother mockery. What was the use of a moon now?

There came from a little distance town the street the sound of a young nmb voice, singing. It was not a ministral voice, yet sufficiently boud, and it knew only a portion of the words and air it sought to remier; but, upon completing the portion it did know, it instantly began again and sang that portion over and over with brightest patience. Thus:

"My countree, 'tls of thee, Sweet land of liber-tee, My countree, 'tls of thee, Sweet land of liber-tee, My countree, 'tls of thee, Sweet land of liber-tee, My countree, 'tls of thee, Sweet land of liber-tee, My countree, 'tls of thee, Sweet land of liber-tee, My countree, 'tls"—

Jane spoke inconsciously, "It's Freddie," she said.

William leaped to his feet. This was something he could not is ar. He made a bloodthirsty dash toward the gate, which the singer was passing.

"You get out o' here!" William roared.

"You get out o' here!" William roared.
The song stopped. Freddle Banks
fied like a rag on the wind.
Now here is a strange matter.

The autique propheta prophesied auccessfully; they practiced with some ease that art aluce lost, but partly rediscovered by M. Maeterlinck, who proves to us that the future already exists, simultaneously with the present. Well, if his proofs be true, then at this very moment when William thought menaclugly of Freddle Itanks, the bright air of a happy June evening -un evening ordinaclly reckoned ten years, nine months and twenty-oue days in advance of this present sorowful evening-the hright air of that imppy June evening, so far in the fuure, was actually already trembling to wedding march pheyed upou a church organ, and this seef same Freddle, with a white flower in his buttonitole and in every detail accountred as a weddlug usher, was an usher for this very William who now tas we ordinarily count times threatened his person

Itut for more intracles:

As William turned agala to resume his meditations upon the steps his incredindus eyes fell upon a performance amazingly beyond fantusy and without parallel as a means to make scora of him. Not ten feet from the porch, and in the white mobalish that made brilliant the path to 'he gate, Misa Mary Handol h Kirst — was walking. She was walking with — niting pomposity in her most pronounced semi-efreular manner.

"You get out o here!" she said in a voice as deep and hourse as deep and make it "You get out.o" here!"

Her intenth n was as plan as the moon she was presenting in her own person a sketch of William by this means expressing her opinion of him and avenging June

"You get out o' here!" she croaked.

The shoeting amineity took William's hreath. He gasped

"Why, you you" - he cried. "Youyou sorty faced little girl!"

In this fasher he directly addressed and Mary Randolph Kirsied for the first lime in this life.

And that was the strangest thing of this strange evening, strangest because, as with life itself, there was nothing remarkable upon the surface of it. But if M. Maeterlinek has the right of the matter and if the hright air of that June evening, almost eleven years in the so called future, was indeed aiready trembling to "Lohengrin," then Will'am stood with Johnnie Watson against a great bank of flowers at the door of a church aisle, that alsie was roped with white satin ribbons. and William and Johnule were walting for something important to happen. And then, to the strains of "Hera Comes the Itride," it did-s stately, solemn, roseate, gentle young thing with bright eyes seeking through a vell for Willhends eves.

Yes, if great M. Maeterlinck is right, it seems that William ought to have caught at least some eerle echo of that webling march, however faint—some bars or strains adulft before their time upon the moonlight of this September night in his eighteenth year.

right in his eighteenth year.

For there, beyond he possibility of any fate to intervene or of any later vague, fragmentary memory of even Misa Pratt to impair, there in that mornlight was his future before him.

He started forward furiously. "You-you—you little"—
But he paused, not wasting his breath

npon the empty air.

His bride to be was gone.

THE END.

SOMETHING TO EAT.

We have been instructed in several languages this year to use cornment and save white flour, which we are all willing to do; here's hoping we

here's hoping we do not run out of cornmeal.

Corncake. — Sift together one cup-

ful of flour, three-

fourths of a cupful of sugar, four teaspoonfuls of baking powder and a half-teaspoonful of salt. Beat one egg and one egg yolk; and three-fourths of a cupful of milk and stir into the dry ingredients with

three tablespoonfuls of melted hulter.

Pumpkin Pie (New).—Beat two eggs, add two cupfuls of strnined pumpkin, one-fourth of a cupful of orange marmalade, chopped fine, a little salt, a cupful of cream and a cupful of milk; mix and bake in a large pie pinte lined with crust. Bake one hour.

Deviled Rabbit.-Melt half n tablespoonful of butter tn a chafing dish or a double holler; add half a pound of common cheese cut thin and stir constantly until it is melted; add onefourth of a teaspoonful of salt, half a teaspoonful of paprika, one tablespoonful of picalil or mixed mustard pickle finely chopped, one teaspoonful of Worcestershire sauce and the yolks of two eggs henten and mixed with half a cupful of cream; stir constantly and cook over holling water until smooth and thick. Serve at once for luncheon or supper on hot crackers or bread toasted on one aide.

Tango Salad.—Peel and halve and core ripe, julcy pears, and if desired, cut the halves in thin slices without cutting quite through. Ruh them with the cut side of a lemon, set a hall of cream cheese or a few cubes of Roquefort in the cavity, set these on heart leaves of lettuce and pour over a dressing made as follows: Beat a fourth of a cupful of olive oil with a teaspoonful of vinegar, salt and mustard, half a teaspoonful of paprika, and one-fourth of a cupful of chilissauce, until well hiended, then beat into a cupful of mayonnaise.

## Necie Maxwell

Seeing Ahead.

There is always room for a man of force, and he makes room for many. A feeble mma can see the furms that are fenced and tilled, the houses that are built. The strong mma sees the possible houses and furms. His eye makes estates as fast as the subbreeds clouds.—Emerson.

### Paths to Happiness.

It is the most beautiful truth in morals that we have no such thing as a distinct or divided interest from our race. In their welfare is ours, and by choosing the broadest paths to effect their happiness we choose the surest and the shortest to our own.—
Itulwer Lytton.

## POTTS' GOLD DUST FLOUR

IT'S

BRIGHTER, WHITER AND LIGHTER Than Any Other Brand

1-wheat use more corn 2-meat use more fish & beans 3-fats use just enough 4-Sugar use syrups

## and serve the cause of freedom

WHEATLESS BISCUITS.

Purched comment is the feature of these excellent wheatless biscuits. First, the comment-one-hulf a Copis put in a shallow pan pluced in the is a delicate brown. The other tugreof pennnt butter and one and a half cups of water. Mix the peaunt but this mixture is hot stir in the mea | biscults, each of which contains one sixth of an ounce of protein.

DELICIOUS CORN MUFFINS.

Here's an old fashioned recipe for orn mufflus that has recently been oven and stirred frequently until it revived and used with nonsnat success in several of the larger New York hodients are a tenspoon of salt, a cup tels: To make three and a balf dozen mufflus take one quart milk, six ounces ter, water and sait and heat. While light syrup or honey, four eggs, pinch of sail, two ounces baking powder, stuffs over had roads? which should also be hot. Beat ther one and a half pounds comment and oughty. The dough should be of sucl one and a half pounds rye flour. The consistency that it can be dropped butter and syrup should be thoroughly from a spoon. Buke in small caker mixed; then add the eggs gradually. in an imgrensed pan. This makes it Pour in the milk and add the rye flour mixed with cornmeal and baking pow-

## FACE the FACTS

ET us face the facts. The war situation is critical. Unless the Allies fight as they never yet have fought, defeat threatens. Hungry men cannot fight at their best; nor hungry nations. France, England. and Italy are going hungry unless we feed them.

Wheat Savings-They must have wheat. It is the best food to fight on. It is the easiest to ship. alone can spare it to them. By saving just a littleless than a quarter of what we ate last year-we can support those who are fighting our battles. And we can do it without stinting ourselves. We have only to substitute another food just as good.

The Corn of Plenty-Corn is that food. There's a surplus of it. Providence has been generous in the hour of our need. It has given us corn in such bounty as was never known before. Tons of corn. Train-loads of corn. Five hundred million bushels over and above our regular needs. All we have to do is to learn to appreciate it. Was ever patriotic duty made so easy? And so clear?

America's Own Food-Corn! It is the true American food. The Indians, hardiest of races, lived on it. Our forefathers adopted the diet and conquered a continent. For a great section of our country it has blong een the staff of life. How well the South fought on it, history tells. Now it can help America win a world war.

Learn Something—Corn! It isn't one food. It's a dozen. It's a cereal. It's a vegetable. It's a bread. It's a dessert. It's nutritious; more food value in it, dollar for dollar, than meat or eggs or most other vegetables. It's good to eat; how good you don't know until you've had corn-bread properly cooked. Best of all, it's plentiful and it's patriotic.

Corn's Infinite Variety-How much do you know about corn? About how good it is About the many delicious ways of cooking it? And what you miss by not knowing more about it? Here are a few of Its uses:

There are at least fifty ways to use corn meal to make good dishes for dinner, supper, lunch or breakfast: Here are some suggestions:

### HOT BREADS

Boston brown bread. Hoecake. Muffins. Riscuits. Griddle cakes.

Waffles.

### Corn-meal molasses cake. Apple corn bread. Dumplings. Gingerbread.

Fruit gems. **HEARTY DISHES** Corn-meal croquettes. Corn-meal fish balls.

**DESSERTS** 

Meat and corn-meal dumplings. Tamales. Italian polenta. The recipes are in Farmers' Bulletin 565, "Corn Meal as a Food and Ways of Using It," free from the Department of Agriculture

### MADISON COUNTY

(Continued from Column Two.)

Manpin, who transports produce to Lexington, vin auto truck, was foreed to abandon his car about a mile out from town and board a train for home. 'the train being delayed and tied up he didn't arrive home for the snow being drifted many feet,horse for a disease of the eyes, known to the old school veternnrimis as "hooks," The operation proved successful. - The Acro Squadron of which Elmo Flanery is England to France, - John W. ville, was smashed badly. Flanery is planning to attend a course of lectures on Agriculture in the South.

### DEPARTMENT OF PUBLIC ROADS OF KENTUCKY

Why don't you interset yourself in the road affairs of your county? With good roads you save at least twenty cents per ton per nitle feer army of 250,000, to be field in on all material hauled over the readiness to meet the demands of the roads. Figure what good roads will shipyards. Standard wages will be

more from good roads than your try axes will be to build them.

road if he would be willing to lose three shift system, which is contemthe road if his taxes to build it plated in all of the yards of the counwere refunded to him. His answer try. It is expected that more than 50 will be "No." That should convince per cent of the men will be past draft

The high cost of living will be reduced if roads are built so that the products of the farm can be hanted to market cheaply.

Who pays the cost of hauling food

There is not a legitimate argument against good roads—build more

Hemember that the first road bull is not the last one to be built.

### ASSIGNMENT OF REGISTERED BONDS

By an official order of the Treas. ury, the assignment of registered bonds herebefore made only before certain Treasury officials and the officers of certain courts and Federal reserve and national banks can bor Department as a reserve to fill low legally be made before officers positions in Government offices, re of incorporated State banks and trust companies,

This will be a great relief to many hobbers of registered bonds living in small towns and cities where there are no national banks or persons before whom the assignment could begally be made.

Heretofore it has not been usual for a few to be charged for the assignment of bonds, and it is presomed that the newly designated agencies will conform to the custom and make no charge,

### FEDERAL LOANS TO FARMERS REACH NEARLY \$30,000,000

Up to December 1, \$29,824,655 had been paid out to farmers on five per cent long time loans, according to a report covering the operations of the Iwelve Federal Land Banks, The tolal of boans approved, including those closed and those awaiting veriileation of title and other formalities, is \$105,136,529.

The interest rate under the farm oan system has been increased from 5 to 5% per cent, to apply to all applications which have not yet been approved,

Borrowing is done through oneperative farm loan associations organized by farmers, each association being composed of to or more farmer-borrowers and each group borrowing at least \$20,000. Up to December t, the farm loan board had chartered t,800 such cooperative associations.
